EDUCATION

B.E in Computer Science, Sudharsan Engineering College — **2021-2025**
CGPA: 8.38/10 — Tamilnadu, India

Higher Secondary, Holy Cross Girls Higher Secondary School — **2020 - 2021**
Percentage: 90% — Tamilnadu, India

SKILLS

Programming Languages	C, Python, HTML, CSS, JavaScript
Frameworks/Libraries	NumPy, Pandas, Tkinter
Databases	MySQL, SQLite
Developer Tools	Git/Github, Google Colab, VS Code, Anaconda
Academic Coursework	Data Structures, CN, OOP, DBMS
Certifications	Generative AI,HTML,CSS,JS(Guvi) | Python,Agile Development, Scrum ,Data science(Infosys Springboard) | Artificial Intelligence (IBM) | Oracle Cloud Infrastructure Assosciate (Oracle))| Network Essentials (Cisco) (View)

INTERNSHIP EXPERIENCE

Galwin Tech | Machine Learning Intern — **July 2024 - August 2024**

- Designed and trained ML models to predict heart disease risk with 85% accuracy.
- Preprocessed structured clinical data using encoding and scaling techniques to optimize input features.
- Implemented Logistic Regression and ensemble methods; enhanced performance through iterative evaluation.
- Collaborated in a team of 4 to build a machine learning model achieving 80% accuracy, while strengthening communication and coordination skills.(Project Link)

PROJECTS

- **Heart Disease Prediction:** Built a predictive model using Logistic Regression and Random Forest with 85% accuracy. Applied data preprocessing, feature engineering, and hyperparameter tuning. Visualized metrics using Matplotlib and Seaborn to improve model interpretability and assist in clinical analysis.(Project Link)
- **Fake News Detection:** Developed a real-time fake news classifier using NLP and machine learning. Increased accuracy from 64% to 80% by applying TF-IDF vectorization and feature optimization. Achieved inference times under 1 second to support real-time usage.(Project Link)
- **Employee Management System:** Engineered a console-based application using OOP principles to manage over 200 employee records. Implemented text file storage, input validation, and exception handling, reducing system errors by over 90% and enhancing reliability.(Project Link)

TECHNICAL PRESENTATIONS

Real-Time Heart Disease Prediction using Gradient Boosting & DenseNet Algorithms
Indra Ganesan College of Engineering, Apr 2024
Proposed and presented a hybrid ML-CNN model achieving 12% higher accuracy in real-time heart disease detection.

Cybersecurity Concepts and Threat Mitigation
CARE College of Engineering, Jun 2022
Delivered insights on modern security frameworks and practices for intrusion prevention.
